BIOMETRIKA

A JOURNAL FOR THE STATISTICAL STUDY OF BIOLOGICAL PROBLEMS

FOUNDED BY

W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

EDITED BY

KARL PEARSON

ASSISTED BY

EGON SHARPE PEARSON

AND

GEOFFREY M. MORANT

VOLUME XXVII

1935

ISSUED BY THE BIOMETRIKA OFFICE
UNIVERSITY COLLEGE, LONDON
AND PRINTED AT THE
UNIVERSITY PRESS, CAMBRIDGE

PRINTED IN GREAT BRITAIN

Science
Paxon

CONTENTS OF VOLUME XXVII

Memoirs

		PAGES
I.	A Second Piebald Family from Suffolk. By E. A. Cockayne. With two Plates and Pedigree in the Text	1—4
II.	Pedigrees of Hereditary Epicanthus. By C. H. Usher. With thirty-four Figures in the Text	5—25
III.	Growth Changes in Bodily Size and Proportions during the first three Years. A Developmental Study of sixty-one Children by Repeated Measurements. By Nancy Bayley and Frank C. Davis. With four Plates and thirty Figures in the Text	26—87
IV.	Endocranial Diameters and Indices, with a new Instrument for measuring Internal Diameters of the Skull. By K. Wagner. With two Figures in the Text	88—132
V.	Note on Section VI of Dr Wagner's Memoir. By Karl Pearson	133—144
VI.	Some Problems on the Analysis of Regression among k Samples of two Variables. By B. L. Welch. With three Figures in the Text	145—160
VII.	On an Important Class of Statistical Hypotheses. By Stanisław Kołodziejczyk	161—190
VIII.	Ein Beitrag zu Untersuchungen über zweidimensionale Verteilungen von Massenpunkten bei zufallsartig bedingten Bewegungen. ["Streuung" für Moskitos.] Von Henry Mählmann. With five Figures in the Text . . .	191—227
IX.	Thoughts suggested by the Papers of Messrs Welch and Kołodziejczyk. By Karl Pearson. With one Figure in the Text	228—259
X.	Statistical Principles of Routine Work in Testing Clover Seed for Dodder. With one Figure in the Text. By J. Przyborowski and H. Wileński. With one Figure in the Text	273—292
XI.	A Study of Predynastic Egyptian Skulls from Badari based on Measurements taken by Miss B. N. Stoessiger and Professor D. E. Derry. By G. M. Morant. With two folding Tables .	293—309

PAGES

XII. The Ratio of the Mean Deviation to the Standard Deviation as a Test of Normality.

Section I. Introduction of the Ratio w_n and its Distribution. By R. C. GEARY. With one Figure in the Text . . 310—332

Section II. A Comparison of β_2 and Mr Geary's w_n Criteria. By E. S. PEARSON. With four Figures in the Text and Appendix with Tables of Samples . . . . 333—352

Section III. On the Correlation of β_2 and w_n. By R. C. GEARY . . . . . 353—355

XIII. On the Validity of a certain Pearson's Formula. By JAN WIŚNIEWSKI. With two Figures in the Text . . . 356—363

XIV. On the Corrections for Broad Categories, being a Note on Mr Wiśniewski's Memoir. By KARL PEARSON. With a folding Table . . . . . 364—372

XV. The Anglo-Saxon Skulls from Bidford-on-Avon and Burwell, with a comparison of their principal Characters and those of the Anglo-Saxon Skulls in London Museums.

Part I. The Bidford-on-Avon Anglo-Saxon Skulls. By J. C. BRASH and MATTHEW YOUNG. With four Plates and a folding Table of Measurements . . . . . 373—387

Part II. The Burwell Anglo-Saxon Skulls, including a Comparison with those of certain other Anglo-Saxon Series. By DORIS LAYARD and MATTHEW YOUNG. With three Plates and a folding Table of Measurements . . . . . 388—408

XVI. On the Numerical Evaluation of High Order Incomplete Eulerian Integrals. By KARL and MARGARET V. PEARSON . 409—423

XVII. Further Investigation of the Morphometric Characters of the Individual Bones of the Human Skull. By KARL PEARSON and T. L. WOO. With two Diagrams in the Text . . 424—465

Miscellanea

(i) Constancy in the Number of Ligulate Flowers of Chrysanthemum leucanthemum, variety Pinnatifidum, during the Flowering Season. By WILLIAM D. BATEN. With four Figures in the Text . . . . . 260—266

(ii) Strength of Vision in Relation to Eye and Hair Pigmentation. By CATHERINE M. THOMPSON and E. M. ELDERTON . . . . . 266—268

(iii) Note on the Sampling Distribution of $\sqrt{\beta_1}$, where the [Parent] Population is Normal. By P. WILLIAMS . 269—271

PAGES

(iv) Note on Dr Usher's Paper on Epicanthus. By KARL PEARSON . . . . . 271—272

(v) The Distribution of the Difference between the Extreme Observation and the Sample Mean in Samples of n from a Normal Universe. By A. T. MCKAY . . 466—471

(vi) Review of Eldon Moore's *Heredity, mainly Human* . 471

List of Plates and Folding Tables

E. A. Cockayne: A Second Suffolk Piebald Family.
Plates I and II. Members of the Family . . . . . *to face page* 4

Nancy Bayley and Frank C. Davis: Growth Changes in Infants.
Plates I and I (*bis*). Comparisons between a slender child and a stocky child at three age levels, 1, 5 and 30 months . . . „ 68—69
Plates II and II (*bis*). Comparisons between a consistently small child and a consistently large child at three age levels, 1, 9 and 36 months . . . . . „ 68—69

G. M. Morant: A Study of Predynastic Skulls from Badari.
First Folding Table. D. E. Derry's Measurements of Male Adult Badari Skulls . . . . . „ 308
Second Folding Table. D. E. Derry's Measurements of Female Adult and Juvenile Badari Skulls . . . . . „ 308

Karl Pearson: On the Corrections for Broad Categories.
Folding Table of Data from Polish Censuses of 1921 and 1931 . „ 365

J. C. Brash and Matthew Young: The Bidford-on-Avon Anglo-Saxon Skulls.
Plate I. *Normae laterales* of Male Anglo-Saxon Skulls from Bidford-on-Avon . . . . . „ 384
Plate II. *Normae faciales* „ „ „ „ „ 384
Plate III. *Normae verticales* „ „ „ „ „ 384
Plate IV. *Normae occipitales* „ „ „ „ „ 384
Folding Table of Measurements of Bidford-on-Avon Skulls . . „ 386

Doris Layard and Matthew Young: The Burwell Anglo-Saxon Skulls.
Plate I. Typical Anglo-Saxon Male Skull from Burwell in *Norma lateralis* and *Norma facialis* . . . . . „ 392
Plate II. Typical Anglo-Saxon Male Skull from Burwell in *Norma verticalis* and in *Norma occipitalis* . . . . . „ 392
Plate III. Typical Mandible of Anglo-Saxon Male Skull in two aspects . . . . . „ 392
Folding Table of Measurements of Anglo-Saxon Skulls from Burwell „ 407

Erratum

Page 18, first footnote, *for* "Figs. 25 and 26" *read* "Figs. 24 and 25."
